WILSON WOULD REPEAL ALL PROTECTIVE TARIFF LAWS.

The following is taken from an address delivered by Professor Woodrow Wilson before the tariff board in 1882, showing his view then on the question of the tariff and the distinct announcement of his position as a free trader, opposed to all tariffs except merely for the purpose of raising revenue:

"But the danger of imposing protective duties is that when the policy is once embarked upon it cannot be easily receded from. Protection is nothing more than a bounty, and when we offer bounties to manufacturers they will enter into industries and build up interests and when at a later day we seek to overthrow this protective tariff we must hurt somebody, and of course there is objection. They will say: 'Thousands of men will be thrown out of employment and hundreds of people will lose their capital.' This seems very plausible, but I maintain that manufacturers are made better manufacturers whenever they are thrown upon their own resources and left to the natural competition of trade."

"Protection also hinders commerce immensely. The English people do not send as many goods to this country as they would if the duties were not so much and in that way there is a restriction of commerce and we are building up manufacturing here at the expense of commerce. We are holding ourselves aloof from foreign countries in effect and saying: 'We are sufficient to ourselves; we wish to trade, not with England, but with each other.' I maintain that it is not only a pernicious system, but a corrupt system."

"By Commissioner Garland: 'Q. Are you advocating the repeal of all tariff laws?'

"A. Of all protective tariff laws; of establishing a tariff for revenue merely. It seems to me very absurd to maintain that we shall have free trade between different portions of this country and at the same time shut ourselves out from free communication with other producing countries of the world. If it is necessary to impose restrictive duties on goods brought from abroad it would seem to me as a matter of logic, necessary to impose similar restrictions on goods taken from one state of this Union to another. That follows as a necessary consequence; there is no escape from it."

Mrs E S Beatty, of Blair, Neb, is a guest in the M Boler home.

Don't Burn Up Your New Dress

Scores of women will do it this winter, in some poor, old base burner; and they'll get very little warmth out of it, too.

Don't you think it would be a good idea to buy a First Class Favorite Base Burner, with Triple Exposed Flues, and save enough on your coal bills this winter to buy a new dress in the spring? It is a positive fact—the Favorite does burn less coal and throws out more heat than any other base burner made.

It took an organized body of stove experts nearly fifty years to perfect it. There is no other Base Burner like it, because the features that make it such a wonderful and economical heater are patented. •It is the most attractive and best made stove, too.

In the Triple exposed Flues you will find one reason why it will save fully one half on your coal bills. But there are many other reasons—too many to mention here. Come and see us, and we will show you that there is no other base burner that will compare with the Favorite.
